Ball Field Aggregate

Welcome to Pete Lien & Sons

For nearly a century, Pete Lien & Sons has provided construction materials for our communities to build a better world around us. The company's commitment to customer service and product quality has helped it grow from its humble beginnings to today's large scale, multi-state, operation.

We are proud of our continued traditions of excellence, the expertise and commitment of our employees, and the service we provide. Contact us today to learn how Pete Lien & Sons can provide you with world-class products & services.

“After playing 6 years of professional baseball, this infield mix is one of the best.”
Brian Humphries, Post 320 Baseball

Super Slide

Ball Field Aggregate

When visiting local ballfields, we found that there is a great need for high quality ballfield aggregate in our communities.

• **PROBLEM:** Fields are unstable and sticky when wet, and/or “beachy” and dusty when dry.

- **Our solution:** Super Slide was scientifically developed to create the perfect balance of strength & flexibility, providing your field with better “playability” in any condition.

• **PROBLEM:** Player's skin and gear getting torn up from rough infield conditions.

- **Our solution:** Super Slide was engineered with softer and less granular material resulting in less wear and tear on the players and gear.

• **PROBLEM:** Players and the crowd are having trouble seeing the ball, because of light colored infield.

- **Our solution:** Super Slide is significantly darker than other ball field aggregates -providing less glare on the fields, so players can keep their “eye on the ball”.

“Red-er is better”

• **PROBLEM:** Many fields require a high level of maintenance due to the poor characteristics and blend of the ball field aggregate.

- **Our solution:** Super Slide's proprietary blend is mined, processed, and mechanically blended to exacting specifications resulting in the perfect playing condition with less maintenance.
